Dear FCC:

I am recently retired, a citizen, and keep my trac phone in the car for emergency use only. Four of our 5 children live at least 2 to 4 hours away and I feel very secure traveling with a phone in the car. Because our retirement income is hurting so bad, (stocks, and 401K), our income is not what we had expected it to be and the increase is something we don't need right now.

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,
